The Enlist™ System - Get Control of Tough Weeds

- New 2,4-D Choline
- Glyphosate
- Glufosinate

Following burndown, Enlist Duo® and Enlist One® with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3™ soybeans.

- Convenient blend of 2,4-D choline and glyphosate
- Two modes of action to deliver control and help prevent resistance in your fields

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Ability to tank-mix with glufosinate and other qualified herbicides, customizing the ratio of herbicides to match each farm's needs

On-Target Applications

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/resources/trait-stewardship.html).

To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Dow Agrosciences LLC (or other appropriate affiliates). In consideration of the foregoing, Dow Agrosciences grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Always read and follow herbicide label directions prior to use. Enlist™ products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products.

Enlist E3™ soybean seeds containing the Enlist™ trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3™ soybeans. Additional information and limitations on the use of these products are provided in the Dow Agrosciences Technology Use Agreement and Enlist™ Soybean Product Use Guide. U.S. patents for Dow Agrosciences technologies can be found at the following webpage: www.corteva.us/resources/trait-stewardship.html.

Dow Agrosciences is a member of Excellence Through Stewardship® (ETS). Dow Agrosciences products are commercialized in accordance with ETS product launch stewardship guidance and Dow Agrosciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotechstatus.com.

Enlist E3™ soybeans were jointly developed by Dow Agrosciences LLC and MS Technologies, LLC.™™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of The Dow Chemical Company ("Dow") or an affiliated company of Dow. Excellence Through Stewardship is a registered trademark of Excellence Through Stewardship.

No dicamba may be used in-crop with seed in the Roundup Ready® Xtend Crop System, unless and until approved or specifically permitted by the U.S. EPA and the appropriate state agency for such use. As of July 31, 2020, no dicamba formulations are currently registered by the U.S. EPA for in-crop use with seed in the Roundup Ready® Xtend Crop System in the 2021 season. Current stocks of low-volatility dicamba herbicides XtendiMax® herbicide, Engenia® herbicide and Fexapan® herbicide previously approved for in-crop use with seed in the Roundup Ready® Xtend Crop System may not be used after July 31, 2020. Dicamba may harm crops that are not tolerant to dicamba. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicides products for in-crop use with seed in the Roundup Ready® Xtend Crop System.

NOTICE: DO NOT APPLY ANY HERBICIDE TO SEED IN THE ROUNDUP READY® XTEND CROP SYSTEM UNLESS IT HAS A PRODUCT LABEL SPECIFICALLY AUTHORIZING THAT USE. TO USE A HERBICIDE IN ANY MANNER INCONSISTENT WITH ITS LABELING IS A VIOLATION OF FEDERAL LAW. REFER TO THE BAYER TECHNOLOGY USE GUIDE FOR DETAILS AND RECOMMENDATIONS ON USING APPROVED ROUNDUP® AND LIBERTY® BRANDED HERBICIDES ON SEED IN THE ROUNDUP READY® XTEND CROP SYSTEM.

ALWAYS READ AND FOLLOW IRM, WHERE APPLICABLE, GRAIN MARKETING AND ALL OTHER STEWARDSHIP PRACTICES AND PESTICIDE LABEL DIRECTIONS. COMMERCIAL AVAILABILITY OF XTENDFLEX® SOYBEANS IN 2021 IS DEPENDENT ON REGULATORY APPROVAL.

No dicamba may be used in-crop with seed in the Roundup Ready® Xtend Crop System, unless and until approved or specifically permitted, and no dicamba formulations are currently registered for such use in the 2021 season.

VANTAGE BRAND SOYBEAN TREATMENT

Seed treatments provide farmers with an economical means of protecting seeds and seedlings against early-season insect pests and diseases. This results in stronger and more uniform stands, healthier plants and higher crop yields.

VANTAGE COAT COMPLETE:

ACTIVE INGREDIENTS –

- Thiamethoxam Insecticide
- Azoxystrobin Fungicide
- Fludioxonil Fungicide
- Mefenoxam Fungicide
- Sedaxane Fungicide
- Thiabendazole fungicide

VANTAGE COAT:

ACTIVE INGREDIENTS:

- Fludioxonil Fungicide
- Mefenoxam Fungicide
- Sedaxane Fungicide

Additives:

SALTRO Fungicide

Saltro® fungicide seed treatment offers superior SDS protection and robust nematode activity without the early-season stress.

Hybrid	Maturity	Population	Ear Type	Cob Color	Test Weight	Plant Height	Ear Height	Drydown	Seedling Vigor	Stalks	Roots	Staygreen	GLS	Drought Tolerance	Trait

V815	115	26-36k	Flex	Pink	High	Medium-Tall	Medium	3	2	2	2	1	2	3	Conventional

The Agrisure Viptera®3220A E-Z Refuge® trait stack combines the benefits of a hybrid that maximizes yield when it rains and increases yield when it doesn't, with the most comprehensive above-ground insect control and the convenience of an integrated E-Z Refuge® seed blend. It is ideal for areas where corn rootworm management is not a primary concern

The AgrisureViptera® 3330 E-Z Refuge® trait stack offers the most comprehensive above-ground insect control, with three modes of action on key broad lepidopteran pests and three modes of action on corn borer, plus a convenient integrated E-Z Refuge seed blend. It reduces the need for scouting and treatments, and is a good fit for geographies where corn rootworm is not a concern

*Agrisure®, Agrisure Artesian®, Artesian™, AgrisureDuracade®, AgrisureViptera® and E-Z Refuge® are trademarks of a Syngenta Group Company.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF Corporation.

Agrisure® Technology incorporated into these seeds is commercialized under license from Syngenta Seeds, Inc. Herculex® Technology incorporated into these seeds is commercialized under license from Dow AgroSciences LLC. HERCULEX® and the HERCULEX Shield are trademarks of Dow AgroSciences LLC.

YieldGard VT Pro™ is a trademark of Monsanto Technology LLC.

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

ALTERNATIVE CROPS

There are many benefits to the implementation of cover crops, too many to cover them all in fact. All of us here at Weber Seeds believe in the process and outcomes that cover cropping can have on your farm.

- *Weed Suppression*
- *Water Filtration*
- *Fighting Compaction*
- *Wildlife Management*

It's our responsibility to leave our land better than we received it. Whatever the need, whatever the process, Weber Seeds can help.

- *Bluestem*
- *Switchgrass*

"Sometime in the 1960's our father setup a Clipper fanning mill and began selling certified public soybean and wheat seed," Weber recalls. "Since that time, our seed business has continued to expand with our own private brands and expanding our custom contract production and processing business."

"With our cutting edge processing plant, we have complete control of seed quality from planting through harvesting, conditioning, treating, packaging, and storage."

Weber Seeds, Inc. was originally built on retail and local Missouri sales. Our very own brand of soybeans, corn and wheat, Vantage Brand Seeds, are our core products. Our retail, alongside our wholesale business, has been going strong for over 50 years. Offering a full line of farm seed products, lawn seeds, CRP grasses, wildlife food plot mixes, and Cover Crops.
